R.O.P. Summary

1954 - 1955

U.S. DEPARTMENT OF AGRICULTURE
Agricultural Research Service

ARS 53-7

Issued February 1956

STATE ROP SUPERVISORS

The production records of USROP breeders are submitted to and checked by State ROP Supervisors, whose names and addresses are as follows:

Alabama - Pyron Keener, Poultry Division, Department of Agriculture & Industries, Montgomery 4
Arizona - W. R. VanSant, Poultry and Dairy Specialist, University of Arizona, Tucson
Arkansas - Lowell Lankford, University of Arkansas, Box 391, Little Rock
Connecticut - William A. Aho, Conn. Poultry Improvement Assn., Inc., Storrs
Delaware - George Bringham, State Board of Agriculture, Dover
Florida - D. C. Gilles, Florida Livestock Board, Tallahassee
Idaho - Robert Black, Idaho Poultry Improvement Association, Boise
Illinois - Clarence Ems, Illinois Department of Agriculture, Springfield
Indiana - B. B. Bohren, Purdue University, Lafayette
Iowa - LeRoy L. Kruskop, Iowa Poultry Impr. Supervisory Bd., 409 1/2 Douglas, Ames
Kansas - M. E. Jackson, Kansas State College, Manhattan
Kentucky - John W. Tuttle, Kentucky Poultry Improvement Assn., Lexington
Louisiana - John Benge, La. Livestock Sanitary Bd., Box 4003, Capitol Station, Baton Rouge 4
Massachusetts - Julius Kroeck, Massachusetts Dept. of Agriculture, 41 Tremont St., Boston 8
Michigan - Howard C. Zindel, Michigan State College, East Lansing
Minnesota - Roy C. Munson, Minn. Poultry Impr. Bd., 611 State Office Bldg., St. Paul 1
Mississippi - Paul Yount, Mississippi Poultry Impr. Assn., State College
Missouri - E. M. Funk, Missouri Poultry Improvement Assn., Columbia
New Hampshire - R. C. Ringrose, University of New Hampshire, Durham
New Jersey - B. K. Messersmith, Department of Agriculture, Trenton 8
New York - Bruce Hagan, Poultry Improvement Board of New York, Inc., Ithaca
North Carolina - C. J. Maupin, State College of Agriculture, Raleigh
Ohio - Robert L. Hocker, Ohio Poultry Improvement Assn., Columbus 10
Oklahoma - Carl Wick, State Board of Agriculture, Oklahoma City 5
Oregon - Earl Reitsma, Oregon Dept. of Agric., 208 Poultry Bldg., Corvallis
Pennsylvania - E. J. Lawless, Jr., Pennsylvania Dept. of Agric., Harrisburg
South Carolina - P. H. Gooding, South Carolina Poultry Improvement Assn., Clemson
Texas - Bill Doran, Texas A & M College, College Station
Utah - C. Elmer Clark, Utah State College, Logan
Vermont - Allan Speir, Vermont Dept. of Agriculture, Montpelier
Virginia - Harry L. Moore, Virginia Polytechnic Institute, Blacksburg
Washington - D. F. Allmendinger, Wash. Poultry Impr. Association, Puyallup
Wisconsin - Arnie Guthrie, Department of Agriculture, Madison 2

Information in this report was compiled by the Animal and Poultry Husbandry Research Branch, Agricultural Research Service.

FOREWORD

This report is divided into three sections, (1) random sample test report, (2) report based on the new ROP provisions as published in 9 CFR Part 145, and (3) report based on the ROP provisions as formerly prescribed in Miscellaneous Publication 300. The reason for the latter two sections is that the new provisions became effective after the start of the trapnest year; hence breeders were given the option, for the 1954-55 trapnest year only, of following either the old or the new provisions.

The random sample test, page 13, is optional with all ROP participants and the results may be published in addition to, or in lieu of, the report for the candidates. The test may be conducted either on-the-farm or at a central location. Entries at acceptable central locations are eligible for qualification as ROP Performance Tested Parent Stock. Such stock, if qualified, may be mated in the same combination as used for the production of the entry, and used for the production of "U. S. Certified For Eggs" chicks and eggs.

For each entry reported in the random sample test section, a representative sample of hatching eggs, or of chicks at hatching time, was taken by the ROP Inspector or some other person designated by him. There was no culling from the time the chicks were started until the end of the test, and all available pullets were housed. The chicks were identified with sealed, official bands from hatching time until the end of the test, 500 days after hatching. At that time, the ROP Supervisor submitted to the Animal and Poultry Husbandry Research Branch, for publication, a summary for each test flock.

The records reported on pages 14 to 24 were collected on the breeder's own premises under the supervision of the ROP Supervisor and ROP Inspector of the respective States. At the end of the trapnest period, the records for the candidate flock are summarized by the ROP Supervisor and submitted to the APH Branch for publication.

The records published on pages 14 to 19 are based on the provisions published in the Federal Register of December 9, 1954, (9 CFR Part 145). Qualification of ROP females for such flocks could be on any one or more of the bases (A, B, C and D) described below under "Abbreviations and Symbols."

Records published on pages 20 to 24, are based on the ROP provisions of the National Poultry Improvement Plan as formerly published in Miscellaneous Publication 300. Qualification of ROP females in this instance was based on the requirement that an individual hen must lay a minimum of 200 eggs during a 365-day period or at the rate of at least 60 percent (180 eggs) during a 300-day period. In addition, these eggs had to average at least 24 ounces per dozen and the mature body weight of the hen had to be at least standard weight for the breed and variety.

Reprints from the Federal Register containing the complete provisions of the National Poultry Improvement Plan may be obtained from your nearest ROP Supervisor or by writing directly to the Animal and Poultry Husbandry Research Branch, Agricultural Research Center, Beltsville, Maryland.

After December 1956, it will be possible to obtain the 1955-56 records for many of the breeders by writing to the ROP Supervisor of the State in which the specific breeder is located.

ABBREVIATIONS AND SYMBOLS

Pullorum-Typhoid Class Key:

P - U. S. Pullorum-Typhoid Passed

C - U. S. Pullorum-Typhoid Clean

None - No current classification - breeder has discontinued NPIP participation

Basis for Qualifying ROP Females:

A - Individual birds, 219 eggs in 365 days

B - Individual birds, 60% production for at least 10 months

C - Families of 6 or more, 65% production for at least 10 months

D - Families of 8 or more, 70% production for at least 13 weeks.

* - Not trapnesting this breed and variety in 1955-56

INDEX

As a guide for locating the names and addresses and summary report of participating breeders, pages 3, 4 and 5 contain a complete list of breeders, in alphabetical sequence, showing the breed and variety and page number where the report may be found.

There is also included on pages 6 and 7 a list of participating breeders, by States.
